

MRF2S-6CL-XX – VIVE MAESTRO WIRELESS DIMMER

This is a Vive Maestro Wireless Dimmer. The Maestro Wireless solution incorporates Maestro Wireless load controls, wireless sensors, and wireless remote controls, which provide a system that delivers energy savings, convenience, and ease of installation. Maestro Wireless dimmers and switches use Lutron patented Clear Connect RF Technology, which enables wireless communication with Radio Powr Savr sensors and Pico remote controls for light control and general switched loads. These products are also compatible with the Vive hub which enables a simple setup process using a standard web browser on any Wi-Fi enabled phone, tablet or computer. It also enables control and monitoring of all Vive devices. The Vive hub can be added at any time and preserves existing system setup by extracting local programming from each device. For a complete list of features supported with the Vive hub, call Lite Rite Controls. Note for Replacement: MRF2S – the “S” model can replace the non-“S” model. The Maestro Wireless® solution incorporates Maestro Wireless® load controls, wireless sensors, and wireless remote controls, which provide a system that delivers energy savings, convenience and ease of installation.

Dimmer Load Type:

- MRF2S-6CL is designed for use with permanently-installed incandescent, CFL, LED, or tungsten halogen only

Low-Voltage Applications:

- Use MRF2S-6CL with magnetic (core and coil) low-voltage transformers only. Not for use with electronic (solid-state) low-voltage transformers
