

HJS-1/2-FM/SM – VIVE WIRELESS HUB

This is the Vive Wireless Hub. The Vive hub provides a connection point for Lutron Vive devices such as PowPak wireless dimming and switching modules, PowPak Wireless Fixture Controllers, PowPak 20 A Relay Modules, Maestro Wireless dimmers and switches, Pico remote controls, Radio Powr Savr occupancy sensors, and daylight sensors. For a complete list of compatible devices, see spec sheet (downloadable PDF). **Click here to see the Lutron Vive story.**

Features:

- Communicates with controls on a floor using Lutron wireless Clear Connect technology (range radius of 71 ft [22 m]).
- Distributed system architecture. Wireless sensors and controls must be located within 60 ft. (18 m) line of sight, or 30 ft. (9 m), through walls, of the associated device.
- Supports timeclock events based on both sunrise and sunset or fixed time-of-day.
- Integrated multi-color LED provides feedback on what mode the hub is in.
- Contact Closure Inputs for integration with devices by others including devices for Title 24 Automatic Demand Response

LCDAYLIGHT – LIGHTCLOUD DAYLIGHT

The is the Lightcloud daylight. Stop overlight and start cutting your utility bill with the Lightcloud Daylight. This solar-powered wireless sensor can dim or shut off electric lighting when sunlight is sufficient to achieve your desired lighting level.

- Easy setup – simply power on, confirm device connectivity and call 844-LIGHTCLOUD
- Wireless Sensing & Configuration
- Cloud-based management – no software to install or maintain
- Ambient Light Sensor
- Innovative Self-Powered Design
- No Batteries

RAB Lighting creates high quality, affordable, well designed and energy efficient indoor and outdoor LED lighting, fixtures, sensors and *controls*. Check out the RAB Lighting Controls page.

LMLS-500 — MULTI-ZONE OPEN LOOP DIGITAL PHOTOSENSOR

This is the multi-zone open loop digital photosensor. The LMLS-500 is an open loop, multi-zone photosensor that measures the daylight contribution in order to automatically switch or dim up to three zones of lighting. It is part of a Digital Lighting Management (DLM) system and sends light level signals to control loads connected to DLM on/off or dimming room controllers. The LMLS-500 has a photodiode with an extended range of 1-6, 553 footcandles (fc), and photopic correction to mimic the human eye, for precise measurement of visible light. **Check out Wattstopper DLM products [here](#).**

FEATURES:

- Digital Lighting Management components plug together on a free-topology Cat 5e DLM local network
- Test mode override of programmed time delay allows easy verification of selected settings
- Load status verification allows confirmation and testing of controlled load
- Infrared (IR) transceiver for wireless configuration and control
- Compatible with DLM wall switches for manual override, if desired
- LED status indicators
- Mounting options for toplit or sidelit applications
- Complies with California Title 24, Section 119 requirements

- RoHS compliant
- Qualifies for ARRA-funded public works projects

LRF2-DCRB-WH — RADIO POWR SAVR WIRELESS DAYLIGHT SENSOR

This is the Radio Powr Savr Wireless Daylight Sensor. The LutronR wireless daylight sensor is a battery-powered sensor that automatically controls lights via RF communication to compatible dimming or switching devices. This sensor mounts to the ceiling and measures light in the space. The sensor then transmits the light level to the associated dimming or switching devices that automatically control the lights to balance light level in the space. The sensor combines both convenience and exceptional energy savings potential along with ease of installation. **Check out the RadioRA 2 products page [here](#).**

PCELL 3WI TZ – LC&D 3 WIRE INTERIOR PHOTOCELL

This is the LC&D 3 wire interior photocell. **Check out our Acuity products [here](#).**

- LC&D – 3 Wire Interior Photocell for Daylighting
- Can be used in almost any location without the need to adjust to the reflectivity of the environment
- Standard Ceiling Mount Configuration
- Extended sensitivity range; no adjustment needed
- Ability to be used in both open loop and closed loop applications
- Low Voltage
- Wire into LC&D Blue Box LTD Panel on board Input
- “-TZ” is for the LC&D LTD Panel

WSX D – Wall Occupancy PIR Sensor Switch w/ Dimming

- Wall Occupancy Sensor with Soft Push Button and 0-10 Volt Dimming Capability
- Small Motion Detection up to 20 Ft
- Automatic On
- Integrated Photocell (disabled by default) prevents light from turning on if sufficient daylight is present – not available in Nightlight versions
- Push-button programmable without removing cover plate – adjustable time delays & operating modes
- Pre-configured for wiring without a neutral but is field configurable for code with neutral
- Applications: Small Offices, Small Rest Rooms, Closets, Small Enclosed Spaces
- Great for CA Title 24 Applications (Occupancy, Dimming, Daylight Harvesting)
