## PP20 2P - SWITCH POWER PACK 2-POLE

Power packs are the heart of the low voltage sensor system. A PP20 Series power pack transforms

Class I high voltage (120/277 VAC or 347 VAC) to Class 2 15 VDC for powering remote sensors. The

PP20 and the SP20 Series slave pack are also capable of switching lighting loads on and off using

their internal relays. Class 2 wire leads connect to 18 to 22 AWG low voltage cable running to the

sensors, making installation easy and clean. Power packs also have an elongated chase nipple that

allows it to be mounted either directly through a  $\frac{1}{2}$  inch knockout into a junction box, or inside an

adjacent box for meeting specific local code requirements in ceiling plenums.

The most versatile power pack is the PP20, which utilizes a patented relay contact protection and

can power up to 14 sensors. Dual-circuit control can be handled by two PP20's, one PP20 2P Series

2-Pole power pack, or a PP20 power pack and a SP20 slave packs.

## **FEATURES**

- Powers Low Voltage Sensors (PP20/PP20 2P only)
- Self-Contained Relay(s) Switch Line Voltage Loads
- Relay Contact Protection
- Plenum Rated
