

E0HR-100 SERIES – SELF-POWERED RF HANDHELD REMOTE

This is the self-powered RF handheld remote. E0HR-100 Series handheld remotes provide wireless remote control of lighting loads wired to E0SW-100 Series RF Wall Switches. They do not require any electrical connections or any batteries for operation. Models are available with one or two control buttons. Prior to use, each control button on an E0HR-100 remote must be paired with selected load(s). The remote switches operate using kinetic energy generated when a user pushes a control button. The button action transmits an RF signal to the paired RF Wall Switch(es) connected to the controlled load(s) to toggle the load(s) on or off. The RF transmission range is approximately 50' to 150', depending on product placement. **Check out Wattstopper DLM products here.**

- Handheld remotes work with E0SW-100 RF wall switches
- Provide multi-way control without wires
- Self powered switches do not require batteries
- Include holster for optional mounting
