

PICO-SM-KIT – SCREW-MOUNT KIT FOR PICO® WIRELESS CONTROL

Mounting Considerations:

- Mounting of any RF devices on or in close proximity to a metal surface will drastically reduce the effective range of radio signal transmission or reception.
 - All RF devices must be mounted on non-conductive materials to ensure proper performance.
 - If you wish to mount your PicoR wireless control to a metal surface, the PICO-MOUNT-1-XX-CPN5733 will be required in order to maintain proper RF performance.
