EORS 100 SERIES — SELF-POWERED RF REMOTE SWITCHES

This is the self-powered RF remote switches. EORS-100 Series remote switches provide wireless remote control of lighting loads wired to EOSW-100 Series RF Wall Switches. They do not require any electrical connections or any batteries for operation. Models are available with one or two control buttons in a single-gang device. Prior to use, each control button on an EORS-100 remote switch must be paired with selected load(s). The remote switches operate using kinetic energy generated when a user pushes a control button. The button action transmits an RF signal to the paired RF Wall Switch(es) connected to the controlled load(s) to toggle the load(s) on or off. **Check out Wattstopper DLM products here.**

- Remote switches work with EOSW-100 RF wall switches
- Provide multi-way control without wires
- Self powered switches do not require batteries
- Compatible with decorator wall plates
