

RadioRA 2

Lutron RadioRA 2

Total home control for 3,000 to 5,000 sq ft

RadioRA 2 Consumer Brochure

Lutron Thermostat Brochure

Shading Solutions Brochure

RadioRA 2 by Lutron is a wireless total home control system. This energy-saving system gives you the ability to adjust the amount of daylight and electric light (using light controls and automated shades) as well as temperature in a single room or throughout your whole home. The system can also turn off standby power to small appliances when they're not in use. Total home control is the ability to adjust the amount of daylight and electric light, the temperature, and the power used by appliances in a room, or throughout your home.

Lutron's RadioRA 2 system is flexible, scalable and reliable, allowing you to:

- customize and expand your system from a single room to your whole home, allowing you to tailor your system to your needs and budget.
- Improve the security of your home by enabling you to conveniently turn on your lights from the comfort of your vehicle as you approach your home. Creating a path of light from your entryway through your kitchen ensures

you'll never walk into a dark house again.

- save energy. The energy-saving benefits of RadioRA 2 are kick in when you integrate the full line of Lutron wireless shades and drapes*, as well as occupancy / vacancy sensors and Lutron thermostats. You have the power to decide how you impact the environment.
- add convenience to your daily life. With a total home control system, you can adjust lights, shades, and temperature to the specific level you want, in a particular room, or throughout your house—at the touch of a button.
- create just the right mood or ambiance for any activity—and do it with stylish products that will complement your home's décor.
- add cutting edge technology and wow-factor to your home. RadioRA2 is compatible with smart home solutions from other popular brands for voice, audio, geofencing, scheduling and temperature control including Amazon Alexa, Apple Homekit, Google Assistant, and Josh.ai. [Click here to check out Lutron's Integration page](#) for other professional integration options.**

Ideal For Existing Homes And New Construction

Because RadioRA 2 features Lutron wireless technology, the system installs just as easily into existing homes as it does into new construction. RadioRA 2 Essentials's ease of programming can even be a great project for experienced and technically savvy do-it-yourselfers!***

**At the moment LITE RITE is not a shades products dealers, but we can refer you to one!*

*** Always check compatibility with your intended integration plan prior to purchase.*

**** Always consult with a licensed electrician prior to beginning any electrical work. LITE RITE is not a licensed electrical construction company or electrical engineering company.*
